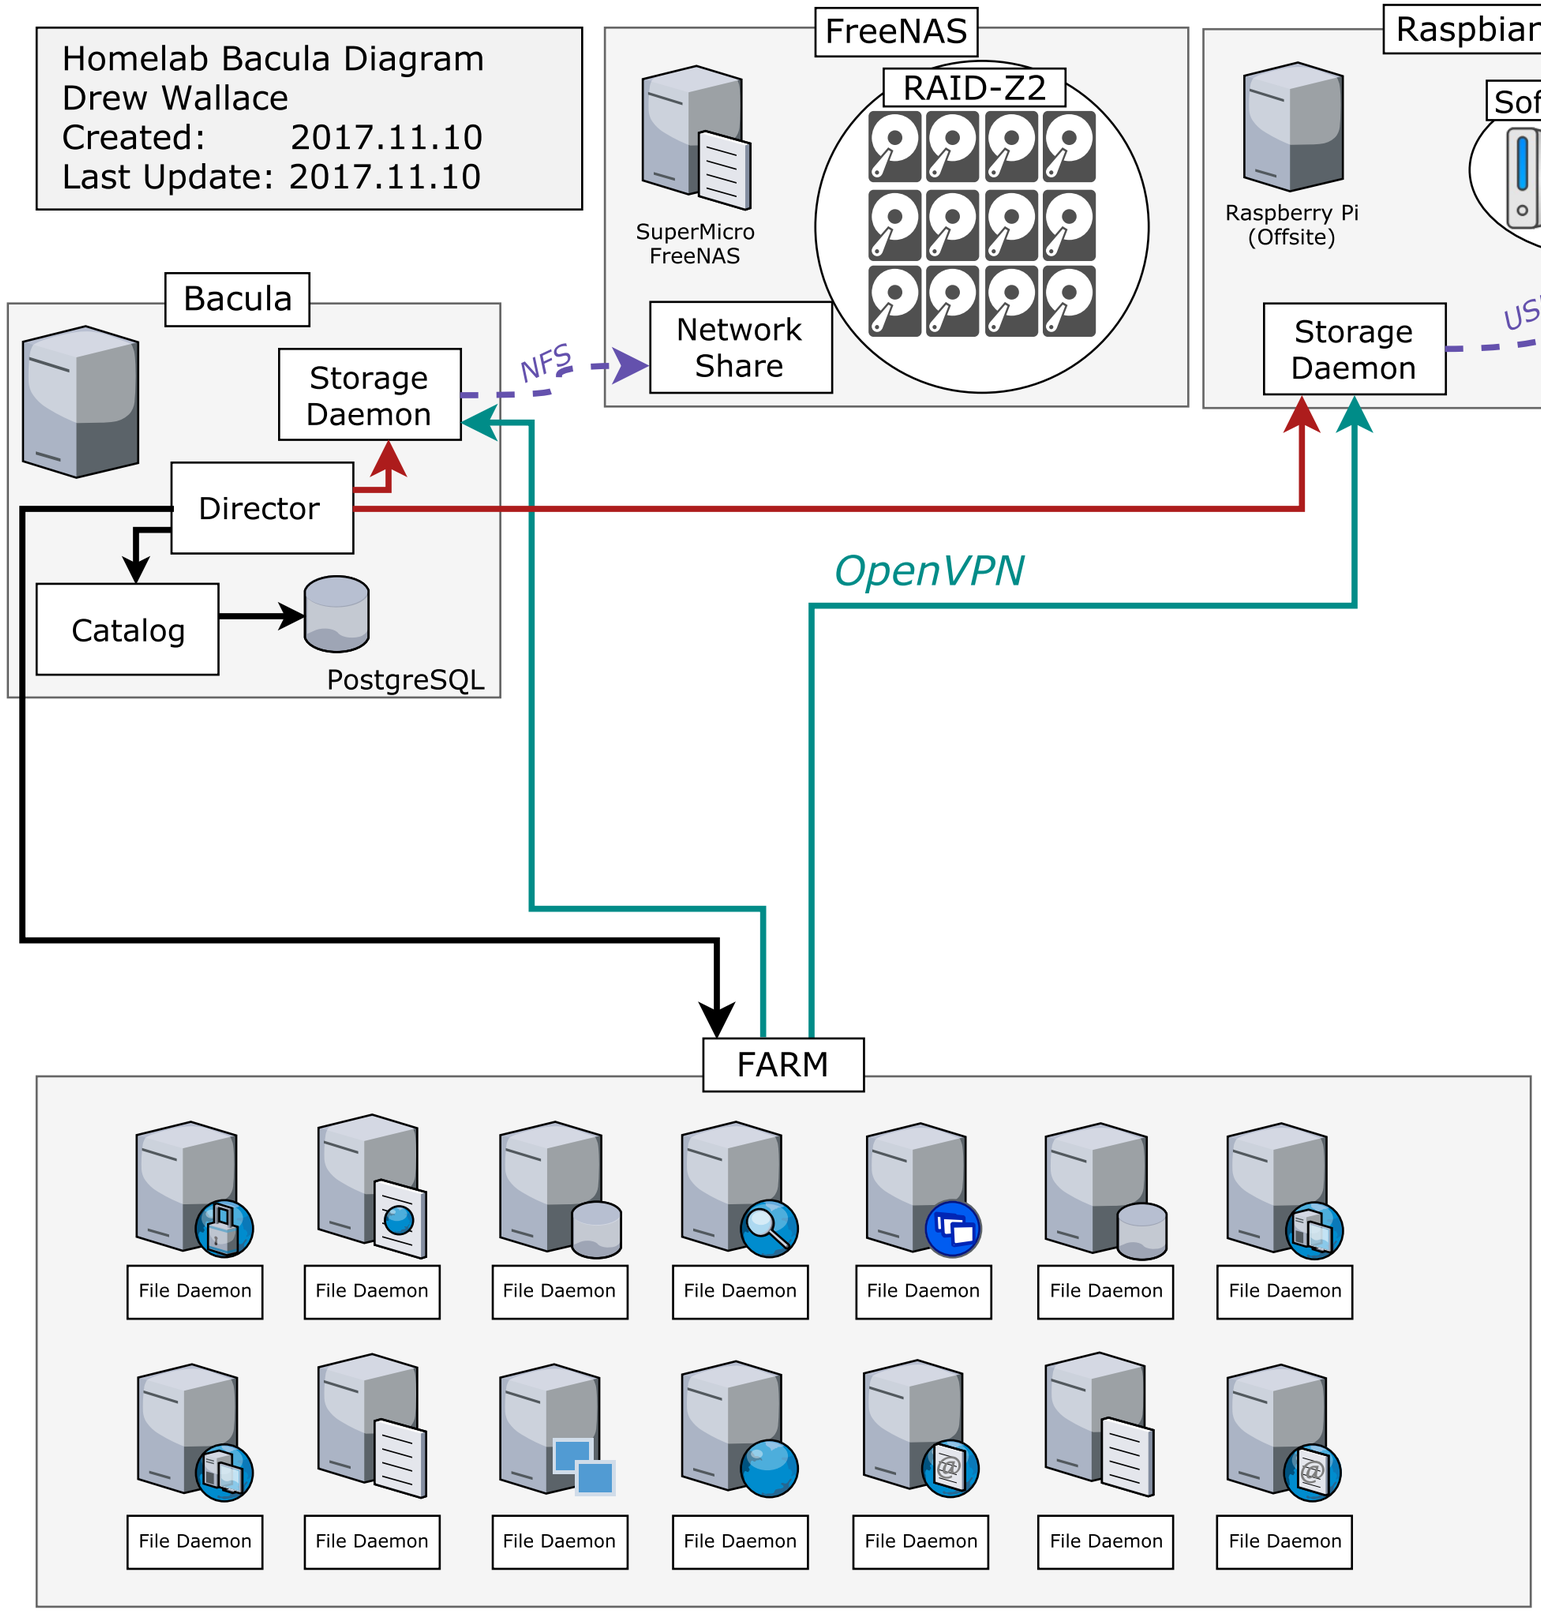
Homelab Bacula Diagram
Drew Wallace
Created: 2017.11.10
Last Update: 2017.11.10



Workflow

1. Bacula Director executes jobs off schedule, logs into Catalog
2. File Daemons of FARM provide backup files to Storage Daemon
3. Storage Daemon saves backed up files into storage containers
4. Director manages and purges files through storage daemons when retention periods are met
